GO TO FAQ ↗

- Image simulated for illustrative purposes. Actual UI may be different.
- Each device must be connected to Wi-Fi or other wireless network.
- For interoperability through SmartThings, all the devices should be registered with a single Samsung Account.
- Available technology, functions, features and services may vary by country, service provider, network environment, or product, and are subject to change without notice.
- Please find 'Works with SmartThings' logo on the product or product package.
- "Bixby" is limited to selected languages and certain accents/dialects.
- Compatible devices must be purchased separately in order to access SmartThings Services.

[1] A Matter-compatible hub is required for connecting Matter devices to SmartThings.
[2] Matter hub functionality will be provided via firmware update. Devices eligible for support: Hub (IM6001-V3P**, STH-ETH-200, STH-ETH-250), Samsung TV (QN900B/QN800B/QN700B/QN95B/S95B/QN90B/QN85B/Q80B/Q70B/Q60B/BU8/The Serif/The Frame/The Sero released in 2022), Smart Monitor (M50B and above released in 2022), Family Hub (models sold in US and Korea in 2017 or later, RH9000 excluded in KR). Update may be applied at different times.
[3] All of the Matter compatible hubs above support Matter devices operating on Wi-Fi radio.
[4] To connect Matter devices operating on Thread radio: to Samsung TV, Family Hub, or Smart Monitor, a SmartThings Dongle or a Thread border router is required. to Hubs STH-ETH-200 or STH-ETH-250, a Thread border router is required.
[5] The feature mentioned above is available on mobile devices that are running One UI 3.1 and above with SmartThings app installed.
[6] The feature mentioned above is available on mobile devices that are running One UI 5.0 and above with SmartThings app installed. Mobile devices with One UI 3.1 and above, but below One UI 5.0 can access the feature through Clock app. Modes are required to be preset by the user.
[7] Available on Galaxy Watch4 and later.
[8] Only available on Galaxy devices. This feature requires Philips Hue White and color ambiance lights and a Hue Bridge.
[9] Galaxy SmartTags have a Bluetooth range of up to 120m without obstacles. Actual performance may vary depending on the environment where they are used.
[10] Currently available with Galaxy smartphones and tablets above Android 8.0, Galaxy Watch with Wear OS or with Tizen OS 5.5 and above, Galaxy Buds+ and later,
[11] To find Galaxy Watch and Buds with SmartThings Find, the latest version of Galaxy wearable app needs to be installed.
[12] The location of your devices, such as Galaxy SmartTag, will only be shared to other members in your SmartThings location on your consent.
[13] Connect wirelessly or use a USB cable to link your mobile device to your car to use SmartThings on Android Auto. To find out if your car is compatible, check the Google Android Auto webpage.
